

Monty's Wheat Study (Fall 2010/Spring 2011)

University of Maryland – Quantico, Maryland – F. Ronald Mulford

Fall and Spring NPK Fertility Program *Plus Monty's Plant Food Program.*

Treatment Description: Fall 2010: broadcast *preplant* (30-10.1-30.3) from a blend of 25 gal/A of 2-4-12 + 8 gal/A of 30% UAN with **64 oz/A of Monty's Liquid Carbon**. Spring 2011: broadcast @ greenup (50-10.1-30.3) from a blend of 25 gal/A of 2-4-12 + 14 gal/A of 30% UAN. *Feeks Growth Stage 5 to 6*, broadcast application of 50 lbs N/A from 30% UAN mixed with **32 oz/A of Monty's Liquid Carbon** and Harmony Extra Herbicide.

Note: Due to Hurricane Irene and the Sea Water and Compaction issues on your soils, apply **Monty's Nanobind** @ 64 oz/A to the fields this fall when planting to deal with these issues.
