PRODUCT DESCRIPTION

Monty's Turf Power SRN can be used on all varieties of cool, transitional, and warm-season grasses. This NPK solution is enhanced with a blend of micronutrients and humic acids that are not found in conventional fertilizers. It can be used in low water volume spray applications without injuring young turf grasses. Turf Power SRN provides plant nutrition to support balanced growth.

DIRECTIONS FOR USE

Trees, Shrubs, and Ornamentals: Can be applied in a uniform drenching pattern under the canopy or dripline or injection. For soil drench use up to 96 oz Turf Power SRN in 75 gallons of water to cover 1,000 sq. ft. For smaller applications mix 1.25 oz Turf Power SRN per gallon of water and apply from the trunk to just outside the canopy. For injection, mix 1 oz per gallon of water and apply 5 gallons of finished mix per inch of trunk diameter (measure diameter of trunk 54" from ground level). **Lawns:** Apply 10 to 15 oz of Turf Power SRN per 1,000 sq. ft. every 4 weeks during the growing season in at least 2 gallons of tank mix. **Golf Courses:** Greens and tees: Apply 4 to 6 oz of Turf Power SRN per 1,000 sq. ft. every 1 to 2 weeks in at least 2 gallons of tank mix. Fairways: Apply 10 to 15 oz of Turf Power SRN per 1,000 sq. ft. every 4 weeks in at least 2 gallons of tank mix.

Do not apply near water, storm drains, or drainage ditches. Do not apply if heavy rain is expected. Apply this product only to your lawn/garden and sweep any product that lands on the driveway, sidewalk, or street, back onto your lawn/garden.

Monty's products are recommended as supplements to your current farming practices and are not recommended to replace the nutrients typically added to the soil. We suggest taking a soil and/or tissue test, have a qualified independent lab analyze the samples to determine nutrient levels in your soils and plants, and then follow the recommendations of a qualified CCA, agronomist, or dealer.

When tank mixing any Monty's products with other farm chemicals, always read and follow the label directions of the chemical(s) you are considering and administer a jar test and/or a strip test before adding Monty's to your tank mix. When mixing with other farm chemicals, tank mix Monty's only after diluting the chemical according to label directions. Knowing the chemical's "mode of action" (block photosynthesis) or metal content (copper based) will help determine the compatibility of Monty's.

Storage and Handling

Use within 24 hours of mixing with water, chemicals or other products. Keep container closed when not in use. Avoid freezing. Products containing organic materials may settle and should be shaken or stirred if stored. Products containing living organisms should not be stored in direct sunlight or allowed to freeze; should not be carried over from one year to the next; and should be used during the growing season in which it was purchased. Store in a cool, dry place. Refer to the SDS for other safety and handling information.

Limited Warranty

Monty's warrants that this product meets its manufacturing specifications. If it does not, Monty's will, at its option, replace the product or refund the purchase price. In no event shall Monty's be liable for special, incidental or consequential damages or for damages in the nature of penalties. Monty's shall not be liable in any way for claims resulting from any use of this product which is not in strict accordance with all directions, cautions and warnings on the label or labels. For products containing living organisms, this warranty is limited to the "use by date" on the label.

FOR COMMERCIAL USE ONLY. KEEP OUT OF REACH OF CHILDREN. HARMFUL IF SWALLOWED. AVOID CONTACT WITH SKIN, EYES, OR CLOTHING.
